

IN THE UNITED STATES DISTRICT COURT FOR THE
DISTRICT OF UTAH, CENTRAL DIVISION

**IN RE: BRCA1—AND BRCA2—BASED
HEREDITARY CANCER TEST PATENT
LITIGATION**

ORDER CLOSING MDL

MDL Case No. 2:14-MD-02510-RJS

Judge Robert J. Shelby

On December 17, 2014, the United States Court of Appeals for the Federal Circuit issued an opinion resolving an appeal arising out of this multidistrict litigation (MDL) case and individual case number 2:14-cv-00640, *University of Utah Research Foundation, et. al., v. Ambry Genetics Corporation*. This court recently received the Mandate related to the Federal Circuit's December decision. (Dkt. 264.) Following that decision, but prior to the issuance of its Mandate, the parties in all of the cases consolidated in this MDL individually settled their respective claims. In response to a series of stipulated motions from the parties, this court entered separate orders dismissing all of the individual cases in this MDL, including the *Ambry Genetics Corporation* case. (Dkt. Nos. 251, 252, 253, 256, 257, 260, 261, and 263.) Having now received the Mandate, the court concludes this MDL should be dismissed and orders the Clerk of Court to close the case.

SO ORDERED this 9th day of March, 2015.

BY THE COURT:

Judge Robert J. Shelby
