

Access to the public wireless network in Courtroom 230

This network does not broadcast the SSID (network name) so manual setup is required.

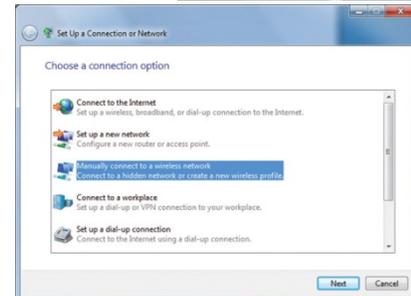

Security	WPA2 ¹
Network Name (SSID)	(call 801 524 6150)
Password	

You will not see the network when you click the Network icon in the notification area of your desktop.

You can access the Set Up a Connection or Network dialog box in Windows 7 by selecting the Set Up a New Connection or Network link in the Network and Sharing center.

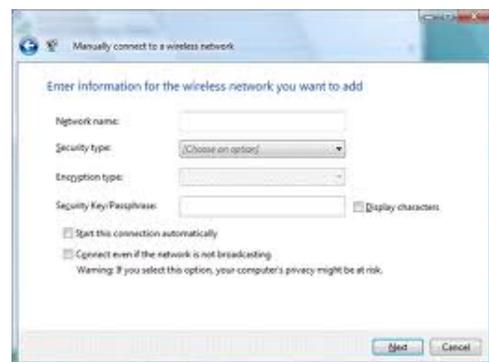

Select “Manually connect to a wireless network.”

When you connect to the Other Network, Windows 7 prompts you to specify the wireless network name (SSID).

Then you will enter the network information as shown above.

¹ WPA2 security is NOT included in Windows XP prior to Service Pack 3. Be sure you have WPA2 before attempting to rely on the court public wifi network. [How to Set Up WPA2 on Windows XP.](#)
